M, m. Gr. Μ, μ. Heb. מ, in fine vocum ם; illud vocant *apertum*, hoc *clausum* & *quadratum*. Ang. *em*, m. Litera liquida, *semidicta*; quæ tamen quatuor muras duntaxat ante se admittit, *c*, *g*, *t*, *d*; idque in Græcis ferè vocibus, unâ *g* excepta: ut *acme*, *agmen*, *Tmolus*, *Admetus*. Hebræis dicitur מם *Mem*, vel à מים *Macula*, quòd majus chartæ spatium illinat; sanè Arabes per maculam repræsentant: vel à מים *aqua*, quam, cùm sit *circumfluus humor*, circuitu suo quoquomodò refert hujus elementi figura. Græci Μῦ appellant, vel à sono, quem edit, instar mugitûs; nam indè fictum *μυκάομαι mugio*; vel à *μύω claudo*, quòd claudat & comprimat labra. In diversis syllabis lubens præcedit cognatas labiales *p* & *b*; ut *ambo*, *ampulla*: se porrò & affinem *n*; ut *annis*, *flamma*: alias non item. Quòcirca, ut illarum consortium fugiat, *am* præp. mutat suum *m* in *n*; ut *ancisus*, *anquiro*, *astruo* & *instruo*, *anfractus*, *enfractus*, *subelo*, &c. nisi si malis præp. istam tam ab *ἀνά* *an* dici debere per Apocopen, quàm ab *ἀμφὶ* *am*; quod non est usque adeò veri dissimile. Certè præp. *circum* retinet ferè suum *m*, ante quàvis consonantes; ut *circumcido*, *circumfero*, &c. etiam ante vocales, ut *circumeo*; ubi *am* adscisci *b*; ut *ambedo*, *ambio*, & ut nonnullis placet, *amburo*. Ante socias liquidas *l* & *r*, ad emolliendam prolationem, accersit cognatas, quas dixi. Itaque inter *m* & *r*, mediam se inserit *b*; ut *ambra*, *umbra*, &c. unde factum, ut quatuor tempora jejunii, quæ Græcè *ἐμβέρια* dicta, nobis *Embre-dayes* vocentur; pari ratione, quâ, pro *μεσημερία*, *μεσαμβρία* dicitur. Rursum inter *m* & *l* media interponitur *p*; ut *amplus*, *exemplar*, (ab *ex* & *similis*) *a* *samplar*; quamquam Anglí hîc etiam *b* sequestrem non recusent, ut *dissimulo*, *to dissemble*. P. etiam conjungit *m* cum *t* mutâ; ut *emo*, *emptum*: ficti gr. à *πρῶτος* fit *πρῶμ∫⊙*. Malè ergo, *id est*, præter rationem, & morem, ni fallor, majorum abs iis factum, qui *p* literam in hujusmodi vocibus *contemtim*, uti ipsi ex affectatâ elegantiâ scribunt, prætereunt, aut potiùs loco movent. Isthoc pacto ex *am* & *tuo* conflatum erat verbum *amputo*, quod eam crucem Grammaticis fixit, ut *ampiuo* legerint aliqui, quod ex *ἀμφὶ* & *tuo* ducit Mart. *ampiuo* alii, quod pro *amburo* poni Scal. voluit. Magnas affinitates colunt *m* & *n*, ut in se mutuò transeant; nam quòd *am* suum *m* mutârit in *n*, reponunt vices *in* & *con*, quæ sæpiùs *n* commutant in *m*, ante *p*, *b*, *m*; ut *impono*, *imbibo*, *imminuo*, *compono*, *combibo*, *comminuo*. Nec id solùm de *am* affirmandum erat, quod in dubium vocari potest; sed in aliis compositis magis certum est, *m* unum ex tribus lineamentis deperdere ante *s*, *d*; ut *tantus* à *tam*, *tantundem* à *tantum*, *quondam*, *quorundam*; & ut aliqui statuunt, ante *c*, *q*; ut *nuncubi*, *nunquis*: itâ Prisc. Verùm inter *m* & *n* non agitur ubique ex æquo; neque enim par jus habet *n* præcedi ac sequendi; quo privilegio tamen gaudent reliquæ duæ *l* & *r*, ut dici possit *alma*, *arma*, &c. non autem *anma*. Setiam aliâ consonante implicitum adhæret *m* in initiis syllabarum in Græcis; ut *smaris*, *phasma*, *asthma*. M servili indole prædita adhibetur in flectendis Nominibus & Verbis; illic pro *v* posita, ut *μῦσαν musam*, *φάρμακον pharmacum*, *σύριγξ syrtim*, *λαμπάδων lampadum*; sed in *Acc.* tertiæ sæpius adventitia, ut *λαμπάδα lampadem*; hic primæ personæ utriusque numeri index, qu. ab *ἐμέ*, *ἐμοῦ*: ego *amabam*, nos *amabamus*. Hæc servilitas effecit, ut in arte metricâ elisioni obnoxia esset, quæ aliàs ex suapte naturâ brevis est; quod evicerit vel hoc hemistichium, *Circumeuntis aqua*. M, uti paucæ aliæ, habet etiam numeralem potestatem, ut *mille* denotet, tanquam prima litera pro integrâ voce poneretur.

N, n,

n. gr. N, *v.* heb. נ, & in fine vocum ן. Ang. N, n. Litera *liquida* eſt, quòd mutas ante ſe in eadem ſyllaba admittat, quibuſcum veluti liqueſcens coaleſcit; duas quidem ſecundi ordinis, ut & *Cnæus* & *Gnæus* dicatur; reliquorum ordinum ſolas tenues, idque in Græcis duntaxat vocibus; utì à πνεῦμα *Pneumatica*, ea Metaphyſicæ pars, quæ agit de ſpiritibus; ab Αἴτνη, *Ætna*: Verùm etiam Græcè χνῦς, dicitur & ὄνυτός. Item *m* præcedit, in græcis initio; ut *Mnemoſyne*: etiam in Latinis, mediâ voce, ut *amnis*, *omnis*. Vocantur & Immutabiles *l*, *n*, *r*; quòd inter flectendum non mutentur; ut *ſal ſalis*, *par paris*, *ren*, *renis*; etiam ubi ſervilem naturam induit, ut à κρῖμα *crimen criminis*: cùm contrà *m* cedat terminationi caſuali, ut *regnum*, *regni*; & in vocibus peregrinis primæ; ut *Abraham*, *Abrahæ*. Hebræis appellatur נון *Nun*, quod & *ſobolem* ſive *filium* notat, & apud Rabbinos *piſcem*. Hoc, quòd נ finale figuram piſcis ſeſe in aquis librantis quodammodò referat; illud, quòd *m* matrem agnoſcat. Quocirca Græci ut *Mem* Μῦ dixêre, ità *Nun* Νῦ, fortè ad differentiam adverbii νῦν, vocârunt. Neque verò longè abit ſonus, utut hæc dentalis ſit, illa labialis, qui in utráque *em* & *en* pariliter tremulus ferit palatum; cùm illa, quod dixi, in labiis ſe ſiſtat incluſa, hæc dentium repercuſſu per nares quærat exitum, unde & *navina* dici potuit; quod & Italorum pronunciatio in *agni* & ſimilibus, & noſtratium in *onion* evincit. Adludit maximè figura, *M N*, *m n*: nam ſicut ex majuſculâ N gr. ſublatâ priore columnâ facta eſt minuſcula ν· ità ex M, poſteriorem ſi demas, ſit ipſa majuſcula N. in hunc modum, M N ν. Apud Latinos lineam tranſverſam, quam majuſcula obliquat, minuſcula in rectum dirigit; ſic, N *n*. Ex hâc ſoni & figuræ ſimilitudine factum eſt ut pro *biennis*, &c. detractâ unâ lineolâ, diceretur *bimus*, *trimus*, *quadrimus*. Summam harum literarum cognationem alia ſunt quæ arguant. Ex ם terminatione plurativâ Chaldæi faciunt ן, quod & nos Angli eſt ubi æmulemur; ut or orten, cow kine, & ey antiq. eyn. E contrà *ov* & *ων* Græcorum Latini in *um* vertunt; ut φάρμακον *pharmacum*, βραχίων *brachium*: *ων* in *am*; ut μῦσαν *muſam*, &c. Huc adde, quòd *n* ante *p b* & *m* in *m* commigret, ut ἀνάπλεως *amplus*, ἀναπολῶ *ambulo*; ſic in Latinè compoſitis, *impono*, *imbibo*, *immoror*, *compono*, *combibo*, *commoror*; & apud nos etiam ante *f*; ut à *conforto*, to comfort, à *confectum*, a comfit. Verùm hæc permutatio & reliquis duabus *l* & *r* ex æquo competit; ut *illudo*, *colludo*, *irrigo*, *corrugo*. Itidem in derivatis; ab *unus ullus* (pro *unlus*, i. *unulus*) ab antiquo *benus* (i. *bonus*) *bellus*, à *catena catella*, à *manibus lavandis malluviæ*; quod & Græci imitati, quum ex *Manlius* Μάλλιος fecerint. Et hæc quidem congruenter Hebræorum diſciplinæ, qui pro *Nun* ſchevato, uti loquuntur, geminant conſonam ſequentem; ut à בנה bana *ædificavit*, בתים battim *domos* dicant; ſic ab אנף, אפים; à חטה, חנטו. Ut taceam de conjugatione *Niphal*. Chaldæi viciſſim, ut Hebræis vicem reponant, pro litera geminata, ſive, ut illi loquuntur, dageſſatâ *n* inſerunt; ut ex אבוב abbub *fiſtula*, Chald. אנבוב anbub, unde Lat. *Ambubaiæ*, ἀνανπρίδες· pariter à לפד lappid, λαμπάδα fecêre Græci; in nonnullis etiam, ubi Dageſch non erat, ut à סדין ſadin σινδών. De his ſatis. Redeo ad *l* & *r*, in quas non ſolùm, ſed altera *l* vel *r* ſequitur, ſed & aliàs *n* mutatur: ut νύμφη *lympha*, unde *lymphatus* is qui gr. νυφόλαπτος· μονὴ *mora*, κνίζω *criſſo*. Secundùm hanc rationem, quæ *gnoma*, eadem & *groma*; quæ *cluna*, eadem & *clura* dicta eſt. At quod majus eſt, *m* & *n* in ſe mutuò tranſeunt; nempe, ut à μαρκέω *marceo*, ità à μενδιάω *nideo*; ut in primo ordine mutarum, ante *p b* ab *n* fit *m*, ut *impono*, *imbibo*; ità in ſecundo & tertio, ante *c q*, *t d*, *m* fit *n*; ut *anciſus*, *anquiro*, *quenquam*, *quendam*, *quanquam*, *quantus*. Nec injuriâ; nam horunce ordinum literas amat, reliquarum ferè, ſive mutæ fuerint ſive ſociæ liquidæ, conſortium vitat. Quas ante ſe admittat, dictum prius. Poſt ſe patitur quas dixi modò, item ſe & ſibilos *s* & *x*, ut *annus*, *anſer*, *anxius* ab *ango*; & in comp. *j* & *v*; ut *conjungo*, *convoco*. Antiqui tamen Græcorum morem obſervârunt, quibus ante κ γ χ, ν mutatur in γ· ut ſcriberent *aggulus*, *agguilla*, *agceps*, *Agchiſes*, pro *angulus*, *anguilla*, *anceps*, *Anchiſes*. N Græcis nominibus in ων finitis detrahunt Latini, ut λέων *leo*, δράκων *draco*: Græci è contrà Latinis in *o* adjiciunt; ut *Cato* Κάτων, *Cicero* Κικέρων. Quòd ſi in *ns* terminentur, tollunt *n*; ut *Pudens* Πούδης, *Clemens* Κλήμης, utì contrà Latini pro ςὰς, ςάντ, inſerto *n*, dicunt *ſtans ſtantis*, &c. Unum eſt, quod prætermitti non debet, ex Futuro ſecundo verbi Barytoni cum hoc *n* epenthetico Latinos ſua verba magnam partem procudiſſe: ut à σκάζω (ſubfilio,) f. 2. σκαδῶ *ſcando*, à σχίζω σχιδῶ *ſcindo*, à λείχω λιχῶ *lingo*, à ῥήγνυω ῥήξω ῥαγῶ *frango*, à ζεύγω ζυγῶ *jungo*. ſic à κύμβω κυβῶ *cumbo*, à λάμβω λαφῶ (unde λαφύσσω) *lambo*: quod in ſupinis interdum ritu Hebraico *Dageſch* i. geminatio literæ ſequentis compenſat; ut *ſcindo*, *ſciſſum*, *pando*, *panſum* & *paſſum*. In derivatis *n* hoc rurſum evaneſcit plerumque, ut *conjux*, *fragor*, *ligurio*, &c. in diminutivis præſertim abjicitur, ut à *lingua ligula*, à *pugnus pugillus*, à *monſtrum moſtellum*, à *ſcamnum ſcabellum*, pro *ſcamellum*; ſicuti nos per diminutionem a *marmore* marble dicimus, q. d. *marbellum* pro *marmellum*; ſit venia verbo.

O, Græcis itidem O, ο· siquidem breve fuerit, quod ο μικρὸν, i. *o parvum* vocant; sin longum, aliâ figurâ exprimunt, Ω, ω· quod ω μέγα, i. *o magnum* appellitant. Parvum purâ & magnum dicitur, non tam aliâ quâvis, quàm solius temporis sive quantitatis ratione: cui rei cùm accuratiorem operam navarent *Græci*, duarum vocalium ε & ο duplices excogitârunt formas; ε ĕ, η ē, ο ŏ, ω ō; reliquis tribus α ι υ in ancipiti statu relictis. *Latinos* ea cura non tangit, qui *breves* & *longas* pariter effingunt; nisi quòd veteribus in more fuerit vocales naturâ productas geminare; quæ tamen distinctio, cùm confusionem pareret, non sine causâ à posteris omissa & rejecta est. Nec sanè aliud erat ο magnum Græcorum, quàm ο parvi geminatio. Sic Latini à Græcis suum ο sive simplex sive geminum mutuati sunt. At undénam ipsi Græci? Ab Hebræis scilicet. Qui pote? Ostendit literarum ordo & numeralis potestas; ν 50, ξ 60, ο 70, π 80. Confer cum Hebraicis; נ 50, ס 60, ע 70, פ 80. Cur ξ sive litera *x* opponatur ἐν παραλλήλῳ τῷ ס *Samech* (h. e. cur *Samech*, quod valet *s*, & *Schin*, unde factum *x*, in Græco alphabeto loca mutârint,) dicemus ubi eò ventum fuerit. Nunc agimus de ע, unde nostrum *O* fluxit: quam literam Hebræi עין *Ain* indigitant, quod & *oculum* & *fontem* sign. utpote, quæ illius quidem orbitam cum cantho, hujus autem puteum unà cum rivulo inde dimanante quoquomodo referat. Sanè Græci, omisso sive cantho sive rivulo, ipsum oculum seu fontem plenè rotundatâ figurâ exprimunt; enimverò & ipsâ figurâ sonum, ore rotundo proferendum. At, inquies, utut figura non sit admodùm absimilis, alludit multùm potestas. Nam quid commercii עין cum *O* in sono; cùm illius literæ sonum, qualisnam sit, nescire se fateantur etiam homines eruditi; quòd Christiani per *gn* & interdum per *ng* efferant, Judæi verò ferè cum נ confundant? Dicam. Libet rem arcessere à fonte. Ante puncta vocalia, quæ vocant, quod nuperum est inventum, solenne erat Hebræis trium consonantium ope omnia vocalium obire munia; scil. א, ו & י, quas *matres lectionis* ideò nuncupabant: ità tamen, ut א pro *a*, י pro *i* & *e*, ו pro *u* & *o* adhiberentur: quod & Arabum genti etiamnum in usu, apud quos universa lectio hoc vocalium ternario absolvitur. Græci igitur ex his matribus suas *ancipites* efformârunt, α ι υ; & præterea cùm *gutturalium* consonantium, è quarum numero erat & א, nullum usum scirent, reliquis tribus in hunc itidem ordinem cooptatis vim vocalium indiderunt; ut nempe pro ה *He* diceretur Ε ψιλὸν, i. *e brève*; pro ח *Heth*, Chaldaïcè *Hetha*, Ἦτα sive *e longum*; pro ע *Ain*, Chald. *Aë* vel *Oë*, Ο μικρὸν, i. *o brève*, quod illi primùs ו vocabant; & postremò nè ο minori privilegio gauderet quàm ε, cùm esset duorum temporum, ex duobus conjunctis effecerunt ω, quod ω μέγα, i. *o magnum* dixere. Et quidem Græcos partim necessitas, partim φιλοκαλία excusat; quanquam fatendum est illos hâc posteriori figurâ diu caruisse, quod lapides probant. Talmudistarum, sive quicunque alii *punctationis* auctores exstiterint, vanitas longiùs processit, ut vocales non pauciores quàm quindecim nobis pepererint; nimirum, cùm triplicato nixu tergeminæ prodirent singulæ, *longæ*, *breves*, & *brevissimæ* sive *raptæ*. Redeo ad ע, cujus duplicem fuisse antiquitùs potestatem evincit ο'. Interpretum tralatio, qui עמרה reddunt Γόμορρα, κλ. ut & עזה quæ illis est Γάζα, Syris olim, Stephano teste, Ἄζα dicta fit. Causam assignat magnus Scaliger, *viz.* priscos Hebræos, quod Arabes hodiè factitant, fecisse; indurato ע, discriminis gratiâ, puncto suprapositò: cujus rei exempla sexcenta observare est, quà in propriis, quà in appellativis, è linguâ Hebræâ in alias traductis. Itaque meram illam gutturalem sive vocalem vim τοῦ ע hicagnoscimus, cujus sono *g* perperàm à plerisque admiscetur. Nè diutiùs extra oleas vager; multa erant de literâ *o* dicenda, quæ aliàs proferentur. Magna ipsi cum *u* intercedit necessitudo, ut facilè permutentur invicem, monente Fabio. Quidni? cùm vocalium universim mirâ sit ἐυμεταβολία & amica conspiratio. Duplex hinc enata *diphthongus* οι & *u* apud Latinos dudum obsolevit, priscis tamen agnita, quibus *Oinone*, quæ nunc *Oenone*, *oitor* & *oisus* in usu, pro quo nunc *utor* & *usus*. Pari ratione *Ousens* fluvius Lucretio & *Ousentina tribus* Festo memorantur. Verùm ut ex αι facta est *æ*, ita ex οι Latina diphthongus *œ*: v. g. à κοῖλον *cælum*, à κοινὴ *cœna*; nisi quòd in finibus nominum pluralium simplex *i* manserit, ut οἱ λόγοι *bi logi*. Similiter *u* in Latinis nudum *u* reliquit; ut pro μῦσα, ἰυνῦχος, σκιῦρος, dicerentur *musa*, *eunuchus*, *sciurus*; ex cujus diminutivo *sciurulus* Anglis id animal nominatur a Squirrill.

P, p.

P p. gr. Π, π & Γ γ. heb. ף, & in fine vocum ך. Angl. P, p. Litera tenuis in primo ordine mutarum, ascitâ vocali *Pe* dicitur, quomodò & Hebræi vocant; *sc.* à פה, pe *os, oris*; cujus figuram apprimè refert rotundatâ cavitate & demisso superiore labro. Apud hos duplici potestate gaudet: quippe Raphatum effertur cum spiritu, ut *ph* vel *f*; induratum verò, *i.* puncto Dagetsch notatum sonat *p*. At majus ei privilegium Græci indulsêre, ut pro diversâ prolatione duplici etiam honestaretur figurâ, π & φ. Illud Πῖ *Pi*, hoc Φὶ *Phi* appellitârunt; utrumque à פ *pi* vel *phi* in statu constructo פּה *pe* vel *phe*. Et quidem de φ aliàs diximus in F. Ex finali ך ansâ in dextram partem inversâ, factum Γ (ut ex Ↄ Romanum C) unde protenso crure dextro fit æquicrurum Π, ex quo rursus imminuto π. Scaliger vult gr. Π ex heb. ג formari, erectâ nim. figurâ, quæ jacebat; idque adeò, quòd Hebræis ignota esset priori ævo ea durior pronunciatio *p*, pro quâ constanter adhibitam ait à veteribus aspiratam *ph*. Propterea π Græcum magis & sono & forma accedere ad ג quàm ך. Id si sit, formabitur vicissim Γ ex Π, crure dextro amputato. Non moveo litem magno viro. Imò placet commentum. Nam pari ratione, ex ף in tergum resupinato minusculum π nullo negotio efformari poterit. Veniamus ad nostram provinciam. *P* certè Latinum aut ex Γ ortum, angulo pensili in semicirculum convoluto; aut, quod magis placet, ex ך, ansulâ sinistrâ, quod dixi priùs, in dextram rejectâ. Vis dicam, cur magis placeat ex Hebraico hanc literam quàm Græcanico Alphabeto traducere? Dicam. Nempe quòd minuscula *p* similiter protracto pede descendat à majusculâ *P*, ut ipsum ך defluxit ex ף. Hùc adde quòd & sequentem pariter literam Q Latini ab Hebræis sumpserint, *viz.* cui respondeat ipsorum ק. Et erat illud mirandum, siquidem à Græcis mutuari vellent, cur πῖ *Pe* figuram τῦ Ῥῶ *Rho* tribuerent, quem sive errorem sive casum versu isthoc perstrinxit Ausonius, *Ausonium si* P *scribas, ero Cecropium* P. Neque enim id consultò factum existimem, tanquam si patibularem τῦ Π & Γ figuram abominati ad proximam transissent. Satis jam diu in re abecedariâ versati sumus. At quid aliud agimus in toto opere? *P* cum cognatis *b* & *v* consonâ, *f* vel *ph* arctas necessitudines colit; ut facilè invicem permutentur. Nam & hæ illius vicem non invitæ sustinent; v. g. πυξῷ, *buxus*; πελεκὺς, *vitricus*; πέλεκυς, *falx*; τρόπαιον, *trophæum*: & illa vicissim his debitas vices reponit; ut κάνωβος, *canopus*; πορφύρα, *purpura*, &c. Neque id modò in vocibus è Græciâ tralatis, sed & in Latinis; ut *Publicola* qui *Poplicola*, *officina* pro *opificina*, *opilio* pro *ovilio*; sicut è contrà *papilio*, Angl. pabilion; sic ex *ob* & *pono* fit *oppono*: etiam antiquitus *optineo* pro *obtineo* dictum. Sanè B, sicut arctiùs comprimit labia, ità, si faciem spectes, geminum P videtur; nec *b* quidquam aliud est quàm inversum *p*. Porrò F penè idem est cum P, interruptâ quasi per flatum continuitate semicircelli; & demisso pede non aliter formatur *f* ex *F*, quàm *p* ex P. Neque verò respuit *p* commercia cum reliquorum ordinum muris; unde factum, ut à λύκος *lupus*, à λαγὼς *lepus*, à σπάδιον *spatium*, etiam pro *quicquid* Oscè diceretur *pitpit*, auctore Festo. Saltem in Æolismo, unde Latinitas fluxit, nihil usitatius, quàm *p* in *q* mutari. Sed & præp. *ad* ante φ mutat suum *d* in *p*: ut *appono*. In mediis vocibus amat complecti *r*; ut *aptus*. Nam ubi *pt* occurrit in initiis, Græcum est; aut alterutrum perit; ut à πτύω *perna*, à πτύτις *tussis*. Assumit in Latinis solas *l* & *r*, ut *pluo*, *precor*; in Græcis etiam *n*, *b*, *s*, & *t*, ut dixi; ut *peripneumonia*, *philosophus*, *psaltes*, *Ptolomæus*. Q, q. Heb. ק. Ang. Q, q. Habuerunt & Græci hanc olim literam, quam etiamnum retinent pro numeri notâ. Atque ſicuti Hebræis קוף *Koph* dicitur, Chald. קופא *Kopha*; ità Græci appellant ἀπίσημον κόππα. Conſtat igitur, unde nomen ſuum hæc notula indepta ſit, utut Alphabeto excluſa. Sed & figura, quam κόππα gerit, ſcil. G, non aliunde efficta eſt, inverſa nimirum; quod & Latinæ Q accidit. Neque id mirum cuiquam eſſe debet, cùm ipſa Hebræorum vox, ſi interpretere, *converſionem* denotet, quòd hæc litera circumductu quodam formetur. Non prætereundum, quod advertit Scaliger, *Koph* Phœnicium (Syrorum putà) pingi jacens, unde enata majuſcula *Q*: Judaicum autem erectum, quod repræſentat *q* minuſcula; capite, quod dixi, ſive circello inverſo: idque ideò, quòd, monente Martinio, Hebræi, contrà quàm nos, retrorsùm legant; quod & in cognatâ literâ C ex heb. ך factum. Reſtat ut ejus vim & uſum perpendamus. Sanè quià Græci carent, id eſt, non egent; ideò fortè Grammaticis nonnullis ſubiit opinari eam itidem Latinis eſſe ſupervacuam. Imò affirmat Papias veteres cuncta per *c* ſcripſiſſe, quæ nunc ſcribuntur per *q*: affirmat, inquam, non probat. Deſideramus exempla & magis idoneam auctoritatem. Quid quòd ipſa figura *Koppatis* (ſic enim locuti Græci κόππα κόππα/ϛ, unde equi eâ notâ inuſti κοππατίαι dicti) ea figura inquam, prout vulgò pingitur, proximè accedat ad Latinum *G*? Expediam paucis. Dixi, cùm tractarem literam *B*, in primo ordine Romanis quatuor eſſe mutas, geminam ſc. mediam *b* & *v*, quod erat ἀνίσημον βαῦ. Pariter ſe res habet in iſthoc ſecundo ordine, ut mediæ *γ* duæ ſtent ex adverſo in acie Latinâ *g* & *q*, quod erat ἀνίσημον κόππα. Agnoſcit hunc numerum lingua primæva: ϗ, κάππα, *c*. ק, κόππα, *q*. ג, *γ*, *g*. & ך, *χ*, *ch*. Ergo *q* ſe habet ad *c* vel *k*, ut heb. ק ad ך. Nondum ſatiſfeci. Roges, quorſum *v* adſcita comes? Certè ut aliqualem ei attribueret vim, dum pleniorem efficit poteſtatem, nè nudè ſonaret (quomodo Galli pronunciant) *k*. Dubitari poteſt, vocaliſne ſit *u* iſthæc an verò conſonans. Vocalem voluit eſſe Schioppius, ut novas inde nobis procuderet diphthongos atque triphthongos, *ua*, ut *qualis*; *ue*, ut *queror*; *uo*, ut *quo*; *uu*, ut *quur*; *ui*, ut *quis*; *uoi*, ut *quoi*. Logi! Non eſſe conſonam rentur, quòd, cum *q* & *v* ſit utraque muta, poſitio fieret, quod tamen non fit, ut in *aqua*, *equa*, &c. ubi prima brevis eſt. At nullo negotio refellitur hoc argumentum; quippe *v* hìc liqueſcit; & in mediâ dictione poſitio tum demum legitimè ſit, cùm prior conſona priorem ſyllabam terminet, poſteriorem poſterior inchoet, ut *al-bus*, *ag-nus*, &c. At in his vocibus ubi *qu* locum habet, ambæ commigrant in ſequentem ſyllabam, & relinquunt brevem vocalem in præcedente ſyllabâ nudam. Alia ratio eſt; quòd *v* iſtud diſſolvi poſſit in vocalem, ut ſi dicas *acῦa τρισυλάβως* pro *aqua*. Nondum ergo vocalis erat, antequàm diſſolveretur; quomodò in *ſylva*, quæ modò conſonantis vim obtinet, per dialyſin fit vocalis *ſylva*.

R, r. gr. P, ρ. heb. ר. Angl. R, r. Hebræis רֹאשׁ *Roſch* dicitur, à רֵאשׁ *caput*; cujus figuram quoquomodo æmulatur, ductu cranium, *i.* ſinciput cum vertice & occipitio repræſentans. Aramicè, ni fallor, רֹאוֹ *Roe* appellatur, unde & Græcis Ῥῶ *Rho* dictum: quorum majuſcula P vacuum ſpatium τῷ ר inſertâ & deductâ lineâ complet & concludit; minuſcula verò ρ, cenſente Scaligero, eadem eſt cum Phœnicio, Syrorum putâ, protenſâ caudâ. Porrò mihi omninò certum videtur, Latinos utrumque ſuum *P, p.* ſive errore ſive conſilio, ex Græco Ρ ρ hauſiſſe; deinde cùm interpoſitâ ex Hebraiſmo ♀, quæ Græcis hominibus deerat, ad *R* ventum eſſet, diſtinctionis gratiâ appendiculam iſtam addidiſſe majuſculæ quidem. De minuſculâ *r* minùs conſtat, niſi quòd ex *γ* factum ſtatuat Martinius; nempe quiâ hoc in illud ſæpe tranſit, quod præcipuè in Comparativis nominum & Infinitivis verborum cernere eſt; ubi *ων* fit *or*, & *ειν* Doricum fit *ren*: ut μείζων *major*, λέγειν *legere*. Fieri tamen potuit ut è majuſculâ truncatâ effingeretur. Nuncupatur hæc conſonans, ſigna alia, ſuo jure *ſemivocalis*, cùm Græcè (quod ei commune eſt cum vocalibus privilegium) & ſpiritum admittat & puram reddat ſyllabam, quod & Latini aliquando imitati, ut ſicuti ibi dicitur ἡ ὥρα, τῆς ὥρας, ſic & ipſi dicerent *Aura, auras*, &c. Aſpiratio iſta an præmitti, an poſtponi deberet, meritò quæri poteſt. Hoc ex uſu obtinuit, ut ῥέδη *rheda*, &c. illud ratio ſuadet, unde pro ὁδὸν Æoles dixêre βοδὸν, β loco ſpiritûs (ſive, quod vult Priſcianus, digamma) poſito. Sanè vetuſtiores ex barbaris (Gothos & Teutonas loquor) *b* ante *l*, *n* & *r* locaverunt. Hebræi etiam ei jus *gutturalium* concedunt, id eſt, non geminant; quod tamen Græci, Latini, & ipſi Arabes faciunt. Et quidem negari non poteſt hunc ſonum in ſummo gutture formari, ità tamen ut linguâ criſpante vibratus & tremulo ictu dentibus aliſus horrificam canum ringentium & hirrientium rabiem imitetur; quare *literam caninam* vocavit Perſius. Molliùs olim & quomodò blæſi pronunciant apud priſcos Romanos ſonuiſſe, indicio eſt, quòd in concurſu vocalium pro digamma *r* non rarò interponerent; ut ἀραιὸς *rarus*, νυὸς *nurus*, μύαξ *murex*, μυὸς *mus muris*, γένος & γένεος *genus generis*, &c. Adde quòd hæc ſoni molliries ſive blanditia effecerit ut ante vel poſt alias conſonas tanquam ſupervacaneum in ſcriptura omitteretur; nam quos *Hetruſcos*, eoſdem *Thuſcos* & *Tuſcos* vocârunt, à θυμὸς *dumus*, à πέρδω *pedo* dixerunt: præſertim ante *s* apud vetetes *r* elilum; ut *ſuſum, ruſus, proſus*, pro *ſurſum, rurſus, prorſus*. Nec mirum; quippe quòd illi non duplicarent conſonas, & verò inter *s* & *r* (cùm blæſè proferrent) tanta eſſet in ſono ſimilitudo, ut penè pro eâdem haberentur. Hinc factum, ut quod illis *aſa, aſena, caſmen* ſonuit, id poſt fieret *ara, arena, carmen*; quos *Fuſios* & *Valeſios* primùm vocârunt, eos poſtea *Furios* vocarent & *Valerios*; item *heleſa, pigneſa, pluſima* antiquitùs eſſent, Feſto teſte, quæ nunc *olera, pignora, plurima*: quomodò & *arboſem*, quam nos *arborem*, appellârunt; cùm etiamnum in recto *arbor* & *arbos* idem ſit. Hinc etiam factum ut ex *uro* ἄερο fieret *uſſi geſſi*, pro *urſi gerſi*, ſicut Æolicè ab ὄρω fit ὄρσω. Nec illud prætereundum hanc mitem ſoni blæſitatem in cauſa fuiſſe, ur *r* & *l* penè promiſcui uſûs eſſent in plurimis vocibus; v. g. *Latialis* & *Latiaris, Palilia* & *Parilia, Alabarches* & *Arabarches*, qui olim *cæluleus* color poſt *cæruleus* dictus, ſicuti & græcè quæ κεφαλαλγία eadem & κεφαλαργία. & prout ex καυθήλ & Latini fecerunt *cantherius*, ità pariter ex *flagellum* Græci φραγγελλον. Sed *r* ſæpius in *l* migrat, in vocabulis Latinis; ut *lemures* qui priùs *remures*; in compoſitione, *intelligo, pelluceo*; in derivatione, à *puer puellus*, à *niger nigellus*, aliáque infinita. Idem nonnunquam inter *n* & *r* contigit: nempe *æreus* & *æneus*; viciſſim *cluna* & *clura*. Sic à κνίσω & *criſpus*, à γνάμψ *groma*; ex *con* & *in, corrigo, irrepo*. Verùm hoc & in aliis fit ante *r*; ut ex *ſub, ſurripio*; ex *ad, arrodo*; etiam ubi *r* non ſequitur, *ad* fit *ar*; ut *arceſſo* *arverſum*, &c. quod monuimus ad D. Supereſt, liquida cùm ſit, quo pacto ei cum mutis conveniat. Et quidem ante ſe in eâdem ſyllabâ quaſvis admittit; ut *pratum, brevis, frango, creſco, gradior, trabo, draco*; *v* & *q* exceptis: item poſt ſe in diverſis univerſas cùm mutas tum liquidas: ut *arvum, arquus, perjurus, perlito*, &c. in fine ſolas *s* & *x*; ut *ars, arx*.
